On behalf of the EON Editors and the EON Editorial Board, we are pleased to announce the winners of our first annual authorship awards at EON. If you haven’t already done so, we encourage you to read this editorial from our October 2022 issue detailing these awards. Briefly, these awards were implemented by the Editorial Board in 2022 to highlight further the excellent content that authors contribute to EON, and we are very excited to be able to roll these awards out this year. We would also like to thank the Editorial Board and the ISMTE Board of Directors for coordinating and implementing these awards.

**Editors’ Choice Winner:**

*Advocating for Yourself in the Workplace: Strategies for Taking Charge of Your Career Development*

Billy Lavelle, Senior Managing Editor, J&J Editorial.

This article by Billy Lavelle beautifully speaks to one of the core values we have here at ISMTE, empowering professionals to take charge of their day-to-day work and careers. One great thing we can see in ISMTE over time is the growth, advancement, and success of our colleagues and our own careers. The Editorial Board agreed that this article provides a practical and applicable guide for all professionals to use in a realm that should be discussed more - developing our careers deliberately and thoughtfully. So, whether you’re a new professional who is just starting to lay the foundation of your career or you’re an established professional looking to continue to develop your growth, this article provides a simple and straightforward overview of some critical points to be mindful of in advocating for yourself and advocating for your growth.

**Readers’ Choice:**

*The Robots Won’t Take Over—Yet: Automated Tools, Human Intervention, and Publication Integrity*

Heather J. Malloy, Senior Manager of Peer Review Operations, Mary Ann Liebert Publishers, Inc.

It should probably come as no surprise that this article by Heather J. Malloy made it to the top of our list of most-read articles. The article was originally published nearly a year ago. Yet, the discussion within the article seems almost even *more* relevant today as we begin to ponder the very real questions and concerns surrounding AI – especially on the heels of the ChatGPT fervor that has swept the world and is undoubtedly making it into
our internal discussions regarding publishing policy around AI. This article, however, provides a practical answer, at least partly, to questions that have circulated the industry and are becoming more and more pronounced.
