American Gastroenterological Association
Co-Editor-in-Chief,
EON

As you know, *EON* has moved to a new publication platform—you can see our [message from the editors](#) from the [November 2021 issue](#) for details on the how and why. In light of this move, I wanted to take this opportunity to highlight some of the key features of our new platform to ensure that you, our readers, can get the most out of your experience.

Current and Past Issues

In addition to the link arriving in your inbox each month, if you point your browser toward eon.pubpub.org, you can click on “Latest Issue” to be taken to the articles, and you’ll also see the full table of contents right on the main page (Figure 1).

If you’re looking for past issues, those can be found by clicking on the “All Issues” button at the top (Figure 2), or by scrolling down until you get to the “Past Issues” header on the main page (Figure 3).

Please note that any issues older than September 2021 are still housed on ISMTE’s website, so the links to older issues will redirect to those archives, where any articles more than two years old will be freely available.

Past Issues

[See all archived issues >>](#)

Figure 3. “Past Issues” section on the main page. The previous four issues will display here, along with a link to connect to the full issue archives.

Article Features: Cite, Social, and Download

Some of the features that we're most excited about on the new platform can be found within each article. At the top of each article, you'll see several buttons to the right of the article title (Figure 4). Among these are "Cite," "Social," and "Download."

Figure 4. Buttons that let you cite the article, share it to social media, or download a copy to read later.

The "Cite" button shows you how to cite the article you're reading and allows you to copy the citation (Figure 5). The "More Cite Options" link opens a new window that provides the article citation in several style formats.

The "Social" button gives you the ability to share the article via social media platforms, including Facebook and Twitter, or via email (Figure 6).

Figure 5. A view of the article's citation after clicking on the "Cite" button at the top right of the article header.

Lastly, the "Download" button allows you to download a copy of the article to save for later, or to take with you on another device, such as an e-reader (Figure 7). You can download articles in PDF, Word document, or EPUB formats, among others.

Leave a Comment

Lastly, readers can now leave comments on all *EON* articles posted on the new platform (Figure 8). We hope this feature will provide a place for curiosity, discourse,

and encouragement. Have a question? Read an article you really liked? Leave a comment!

The image shows a user interface for a comment section. At the top, it says 'COMMENTS' followed by a dot and the number '0'. To the right are four icons: a magnifying glass, a list icon, a funnel, and a close icon. Below this is a row of icons: a user profile icon, a bold 'B' icon, an italic 'I' icon, a link icon, and a 'Media' icon with a camera symbol. A large text input box follows, containing the placeholder text 'Start a discussion here (or highlight some text above to begin one inline)'. At the bottom of the input box is a teal button labeled 'Post Discussion'.

Figure 8. The comment box can be found at the very bottom of every *EON* article.

As you can see, there are many features available as part of *EON*'s new platform. We hope you are as excited about some of these features as we are (though I doubt it... we're pretty excited...).

What did you think of this article? Leave me a comment below.
